Super Supper!

The hardest part, whether you're a seasoned pro or a rookie, is timing everything to come out at the same time.

DON'T SWEAT IT!
A lot of dishes can be kept warm covered or add prepared foods from the deli to help get the timing right.

Roasting Turkey

The center of Thanksgiving dinner, turkey can be the most daunting part of the meal. Cook until temperature reaches 165° F. Cooking times are for planning purposes only – always use a meat thermometer to determine if the turkey is done. (Remember when checking to put the thermometer into the thickest part of the breast and thigh, careful not to go into voids or touching bone).
